

healthcare that cares™

about us

onetoonehealth.com

In 2013, a patient (and local executive) came to his physician with a question. This time, it was on behalf of his workforce. Frustrated with rising costs and dwindling levels of care, he asked "Can you help us?" His primary care physician, Dr. Keith Helton, responded. One to One Health was born.

Today, One to One Health serves members across the country through our at-work and virtual care solutions.

We deliver market-leading direct access to high-quality care through our proprietary TextCare platform. TextCare powers efficient, meaningful interactions between providers and patients. This translates to a 95.7% patient satisfaction rate and 100% client retention rate.

This is what healthcare should be. This is **healthcare that cares™**.

what we do

trusted by:

TextCare

100+ employees

Value-based virtual care meets on-demand concierge medicine. Text or video chat with your One to One clinicians in <5 minutes, 24/7. Simply initiate care with a text. No bots. No copays. No kidding.

Virtual Clinics

1,000+ employees

Our hybrid approach includes a dedicated care team - without the clinic footprint. Leveraging the TextCare platform, employees receive comprehensive care remotely or in person. Hand-picked providers that fit the culture of our clients.

Onsite & Shared Clinics

1,000+ employees

Dedicated primary and acute care, occupational health, onsite generic RX dispensary with seamless coordination into specialists, mental health, health coaching, chronic condition management.
