

Michelle has served as Director, Risk Management for Asurion. I've been with Asurion for 6 ½ years, starting just before COVID hit (that was fun, note sarcasm) and have responsibility for P&C programs for Asurion's operations globally along with any insured claims. Prior to Asurion, I worked for Nissan North America for 17 years, initially in Finance and eventually moving into Global Risk Management. During my time, I helped launch the Canton, MS vehicle manufacturing facility where I stayed for 9 years before moving to Corporate Headquarters and then into Global Risk Management.
